# IDEA

- Sharing Economy is booming (15bn+ invested worldwide)
- Commercial platforms are very successful
  - Car2Go, Uber, Airbnb
- Private platforms have not taken off
  - Sale and demand problem
  - For free → No incentive to rent out

# SOLUTION

- Combined private and commercial sharing platform
- Unlike existing commercial platforms:
  - Not restricted to specific domains (cars, flats)
- Unlike existing private platforms:
  - Paid private sharing → Incentive for private people to rent out

# SHARING

- Private sharing:
  - Smaller and medium-sized items <1000€ (e.g. Bohrhammer)
- Commercial sharing:
  - Larger items (e.g. cars)

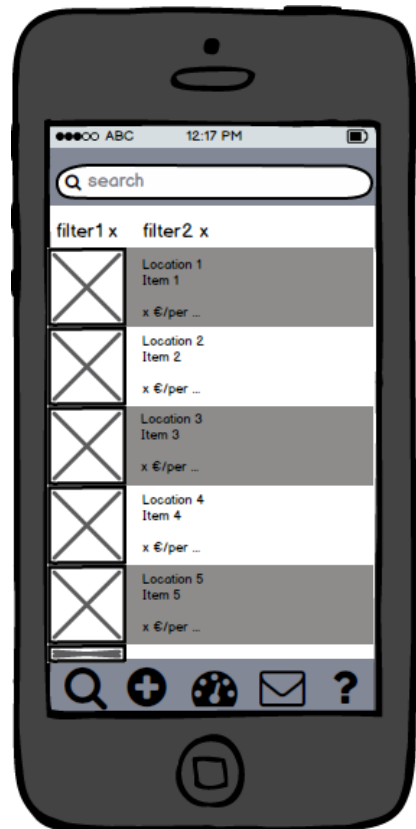

# DEMO

- Cloud-based solution based on Heroku
- Uses Leitz printer for labels, contracts
